***Response to Arguments***

Applicant's arguments with respect to claims 24-27 and 34-36 have been considered but are moot in view of the new ground(s) of rejection.

Newly submitted claims 24-27 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: as set forth previously in the office action mailed 3-9-06, claims 24-27 are not directed to the originally claimed membrane segment. New claims 34-36 are acceptable as the specification describe a hydrogel membrane on pages 26-27.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 24-27 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 34-36 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to

one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claim 34 recites the hydrogel material to be resorbable which is not described in the specification. Examiner believes only pages 26-27 describe the hydrogel material and has not found sufficient support for "nonresorbable". Furthermore, the limitation "hydrogel material has at least one articulating surface that has been provided with a surface layer" does not find support in the specification. Similarly, claim 36 recites the "surface layer is manufactured and then affixed to said hydrogel material" which is not found in the specification.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 34-36 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The preamble of claim 34 define "a hydrogel material" although the body of the claim attempt define a structural device (i.e articulating surface and a surface layer manufactured and attached to the hydrogel material). Therefore it is unclear if the claims refer to a composition of matter or structural device. Examiner suggests amending line 1 of each claim to "A hydrogel membrane".
